

Create attractive banner advertisements and enhance your brand through the powerful and versatile **Banner System Version 5.0**. Managing an advertising management solution can be time-consuming. To minimize your time spent on administrative and maintenance tasks, the Banner System v5.0 is easy to install, customize and maintain. It is equipped with multi-language support, easy-to-use edit and delete functions, full statistics reporting, and configurable rotation settings.

## Banner System 5.0 Main Features

**Categories:** Create an unlimited number of categories and subcategories and organize your banners under them.

**Supports Multiple Banner Formats:** Banner System supports static JPG ads, animated GIF ads, Flash ads, HTML text ads, and Google ads.

**Rotation:** Every banner ad can have a rotation value, allowing you to adjust how often certain ads appear.

**Automatic Campaigns:** Banner ad campaigns can run perpetually or you can have them automatically begin and expire in a given date range.

**Manage Rotation:** Banner ads can be removed from rotation after they exceed a predefined number of click throughs. You can also set the number of times a banner ad can be served up before it's taken out of rotation.

**Metrics:** Get a detailed report on each banner. In an easy to read table format, the Banner System reports when the banner was last served up, how many impressions, and how many click throughs it generated.
