

Manage groups, schedules, appointments, meetings, and events with **Dynamic Calendar 4.2**.

Dynamic Calendar lets you create a full-powered event management service and a registration system that allows you to seamlessly keep track of customers, reservations, payment details, and events.

The Dynamic Calendar v4.2 comes with full system maintenance and is easy to configure. It has multi-currency and multi-language capabilities, as well compatibility with the iCalendar format, allowing users to integrate calendar contents with their desktop calendar application. It's scalable and fully customizable interface ensures that you will have a reliable platform for your business' future growth and development.

Dynamic Calendar Main Features

Multiple Views: Events can be displayed in a standard calendar format, as day view, or as a list view.

Categories: You can set up categories for events and sort your events under the categories. On the front end, users can click on a category and see only events listed under the category.

Filtering Events: Dynamic Calendar provides your site visitors with the ability to search and filter on events.

Featured Events: Events can be flagged as "featured" and listed on a front-end page.

Users Can Post Their Own Events: You can open up Dynamic Calendar to visitors and allow them to post their own events. You can enable moderation to prevent unwanted events being posted. As well, you can set up an admin alert email notifying you when an event has been posted and needs moderation.

Users Can Export Events to iCal Format: Users can get an expanded listing of an event with full details and the ability to export the event to the iCal format.

Allow User to Reserve Online: Site visitors can register online. Dynamic Calendar will automatically generate confirmation emails for the reserving guest and the event host.

Collect Reservation Fees: Dynamic Calendar allows site visitors to register and pay for events from the event's details page.

Customize Your Calendar's Look: Easily change fonts, cell colors, and more from the administration panel.

Customization: Information presented on a listing page is easily customized and expanded using a back-end extra field editor. You can create your own text fields, check boxes, radio buttons, and a whole lot more.

Manage Users and Reservations: Dynamic Calendar provides the web master with powerful user and reservation management tools.

SEO: Event pages allow you to directly configure Search Engine Optimization information like keyword/description meta tags, title bar text, and create a customized descriptive URL.
